

KU Chemistry Club Meeting Minutes for 11/17/2011

Max opened the meeting with a discussion from members concerning the club t-shirt design. Many members of the club shared their ideas, though the group agreed upon a final design which will include a red t-shirt with an Erlenmeyer flask on one of the breasts. The smoke from the Erlenmeyer flask will transition to the words, "KU Chemistry Club". On the back of the t-shirt, the words, "Blowing stuff up since 1909" will be above the KU Chemistry Club Jayhawk graphic.

The meeting continued with various experiments that will be included in the Frozen Flames Show, which will be presented during the Carnival of Chemistry.

Members are reminded that the rehearsal for the "Frozen Flames Show" is set to take place on Saturday, November 19th at **10AM**. This will be a great time to setup the equipment, rehearse the lines of the skit, and practice the experiments.

Members are strongly encouraged to help with the Carnival of Chemistry! This year's Carnival of Chemistry is set to take place from 1pm-4pm on Sunday, November 20th. If any KU Chem Club members know any kids or have any relatives in Kindergarten through 8th grade, the members should invite them to this year's Carnival!

If there are any questions concerning the Carnival of Chemistry or if you haven't received a copy of the Frozen Flames dialogue, please e-mail chemclub@ku.edu
